It may be just that. But nothing will be resolved until the City street light guy comes out and explains it all to Miki. There may also be other aspects that need explaining. Let's meet him @ HBD at 5:30 PM on Tuesday. We can walk to street.

2010/1/15 Jim Kennedy <Jim.Kennedy@lacity.org>

I drove by around 8pm. All lights were on. One was out. But I can't recall if that was in new section or not. Now - they look like different kind of light - white instead of the yellow glow. Not sure if that is what you have a problem with.

Jim

Jim Kennedy...

Please see Miki's feedback on the Sepulveda street lights. Is it possible to get the City's street lighting staff person meet with her on-site one evening next week. It seems to me like we may have some mis-communications going on here. How about Tuesday, January 19 at 5:30 PM? I can be there too; it's right before Bill's LAX / community meeting.
